

A three-step path to AutoIR

Inner loop · bridge · outer loop

1

Feedback *the inner loop*

What feedback, and how to use it to improve and even construct RAG pipelines.

QUAM · SUNAR · ORE · CASE

2

Evaluation alignment *the bridge*

Auto-generated offline benchmarks aligned with online behavior.

LLM judges · click models

3

Self-play *the outer loop*

The outer loop generates data from (2).
The inner loop optimizes from (1).

Together: a system that learns.

next: the selfplay loop in detail
